

## CCM UNIX Secure FTP Lab Utility

Note: This procedure will no longer function under CCM's Security VPN Framework beginning in the Fall2021 semester. It remains the students' responsibility to ensure that their lab work is backed up and recoverable. Please coordinate with CCM IT and Security depts.

Use your favorite **Secure File Transfer Protocol (SFTP)** Client to connect with UNIX from your own machine:

Site: Address is: **itunix.ccm.edu**

Port: **22**

Login using your student userid:

**SFTP <userid>@itunix.ccm.edu** ,dont include the"<>"

Enter your password when prompted.

When connected you should see the files and directories of your home user space.

**ls -lst**

Change to your labpgms directory:

**cd labpgms**

To retrieve a file from your CCM UNIX space:

**get <filename>.<file\_extension>**

To transmit a file to your CCM UNIX space:

**put <filename>.<file\_extension>**

To EXIT SFTP:

**quit**
